

CAROLE BURY BA HONS

Carole's art practice focuses on drawings and paper-textiles inspired by landscapes and the natural world.

Her exploratory vision through observational drawings expresses a visceral relationship between gardens and landscape. These reveal a capacity to shift an understanding of ourselves and the delicate balance of the earth. The enjoyment and experience of being in a landscape is paramount.

Three dimensional responses result in her studio brimming with constructed objects made of paper and stitch, and found treasures lining the shelves.

The drawings and the constructions complement, and ask questions of each other.
